A Special Thank You to our Member Schools

The Kansas State High School Activities Association is grateful for the cooperation from member schools who furnish information printed under the name of each school in this directory. Without their assistance, this publication could not be compiled. The individuals listed in this membership directory make school activities a reality for thousands of youth in the state of Kansas. Their countless hours of work and dedication make activities and academics true curriculum partners.

Academics + Activities = Curriculum Partners

WHY HAVE STUDENT ACTIVITIES? In the last few years the value of high school activities has been questioned. Let's set the record straight as to what high school activities are all about. First of all, they are not a separate part of our overall education program but an integral part of it. A good, well-rounded education means not only one that is academically oriented, but one that also includes physical, social and emotional development. These are available through a good school activities program.

Activities are a citizenship laboratory—Participation in activities encompasses all races and creeds, and teaches a student that it is a privilege and an honor to represent his or her school. Students learn that activities are important because they show a person how to win, and how to lose. Activities teach self-confidence, poise, respect for the rules and good sportsmanship. Through participation in activities, students learn tolerance and understanding for people and how to control their emotions. They also learn the self-satisfaction of accomplishing a goal.

Interscholastic activities constitute a part of the right kind of "growing up" experiences for American boys and girls. Youth are interested in doing things well—in belonging—in displaying loyalty. With a well administered school program, students and spectators become better citizens through participation and observance of activities conducted under established rules impartially administered.

Activities encourage physical and mental excellence—Documented reports and statistics from the high schools of Kansas continue to show the "holding power" of activities programs. Those students engaged in any phase of the extracurricular program show a drop-out rate far below that of the uninvolved student. Over 90 percent of those students who drop out of school at the senior high level have never been involved in any activity as representatives of their school!

Grade point averages of students in athletics, speech, music, cheerleading, club programs, etc., rank well above those students who choose not to participate. Interestingly enough, the statistics point out "the more participation the better the GPA!"

The loss of school instructional time, documented by reports from member schools, clearly shows students miss more instructional class time for family vacations, medical reasons, parental excuses, vocational activities, etc., than they do for all KSHSAA-sponsored school activities combined.

Activities reach out to the community—Activities in our Kansas schools will be as good and as sound as those who administer and support them. Rules and regulations are valueless unless they are embedded in the "grass roots" of the local school and community. The underlying philosophy of interscholastic activities presupposes these rules and regulations are for the good of the students themselves—just as are the other phases of the educational program—and that is the way the citizens of Kansas want them to be.
